3.10 Years of experience in .NET Technologies

+91-7382649211

Senior .NET Core & Microservices Developer | Web API | SQL Server | React.js | xUnit | Azure

OBJECTIVE

Full Stack .NET Developer with 3.10 years of experience in building scalable enterprise applications using .NET Core Web API, Microservices, SQL Server, and React.js. Skilled in JWT authentication, REST API development, and automated testing with xUnit & Moq. Hands-on experience with Agile/Scrum, CI/CD, and distributed logging using Serilog. Strong background in database design, performance optimization, and cloud technologies (Azure).

PROFESSIONAL SUMMARY

- Having **3.10 years** of experience in developing web applications in MVC architecture, 3-tier architecture and console applications for background automation process.
- Good in developing web applications in Microsoft Visual Studio .Net IDE by using **ASP.Net Core, .Net Core MVC, Asp.Net, C#.Net**.
- Good in developing Web APIs in Micro services architecture by using **.Net Core Web API, C#.Net ADO.NET** and parsing services responses by using different types of parsing methods (**JSON, XML**).
- Experience in writing Unit Tests (**TDD**) by using **Xunit, Moq**.
- Experience in writing Database scripts using **SQL Server**.
- Experience in designing UI screens with **Html, CSS, and Bootstrap**.
- Writing client-side scripting code using **React.js, Java Script, jQuery**.
- Experience in writing Database objects (Stored Procedures, Functions) using **SQL Server**.
- Having good experience in source code management using **TFS and GitHub**.
- Good experience in **OOPS** concept.
- Ability to create loosely coupled components.
- Followed **AGILE (SCRUM)** methodologies, daily stand-up meeting.
- Ability to work in a team as well as individually.

TECHNICAL EXPERTISE

Microsoft Technologies	: ASP.NET Core, .Net Core MVC, .Net Core Web API, ASP.Net
Unit Tests	: Xunit, Moq.
Database	: SQL Server

Architecture	: Microservices Architecture, MVC and 3 Tier Layered Architecture
Source Code Management	: GitHub, TFS
Client-Side Technologies	: HTML, CSS, Bootstrap
Client-Side Scripting	: React.js, JQuery, Java Script,
Languages	: C, C#, and LINQ
Cloud Technologies	: Azure
IDE	: Visual Studio 2022, SSMS, Visual Studio Code
Tools	: Postman, Swagger.
Others	: AJAX, JSON and XML

KeySkills:

.NET Core, Web API, C#, Microservices, ADO.NET, SQL Server, Stored Procedures, LINQ, JWT Authentication, Swagger, xUnit, Moq, Serilog, GitHub, TFS, React.js, JavaScript, jQuery, HTML, CSS, Bootstrap, Azure, API Gateway, CI/CD.

EDUCATIONAL QUALIFICATION

- M.C.A (Master of Computer Applications) with 75% from Andhra University in the year of 2014.

PROFESSIONAL EXPERIENCE

- Senior Software Developer in Code Tree Software Solutions Pvt.Ltd, Vijayawada, Andhra Pradesh from Oct 2021 to Till Date.

PROJECTS

GIRIBHUMI

Team Size	15
Client	: Office Of Commissioner Tribal Welfare, Govt. of Andhra Pradesh
Role	: Senior Engineer – Development
Duration	: Dec-2023 to Till Date
Environment	: Visual Studio 2022, .Net Core Web API, Micro Services Architecture, C#, Swagger, LINQ, XUnit, Moq,

Description

A state-wide application for registering and tracking farmer land data, Embedded with geolocation and document storage. RESTful APIs that processed and retrieved land data for **20K+ registered farmers**.

Integrated Google Maps API to capture accurate lat-long coordinates, improving land location accuracy by **90%**. Enabled secure document storage for **5+ document types** (photos, DLC documents, GPS coordinates).

Responsibilities

- Creating the REST API based on Code Generator using Schemas.
- Implementing commands and events in Web APIs.
- Designed and implemented SQL Server database schemas, ensuring efficient data

storage and retrieval.

- Integrating SQL Server with backend systems and RESTful APIs.
- Implemented HTTP requests using ASP.NET Core Web API controllers, enabling clients to interact with SQL Server collections through HTTP requests.
- Designed and implemented a microservices-based architecture for a .NET Core application, using SQL Server as the primary database backend.
- Implemented distributed tracing and logging using tools like Serilog , enabling end- to-end visibility into application performance and data flow.
- Working with Unit tests.
- Involved in User Story Grooming and Technical discussion meetings with Client and Business analysts daily.

E-Farm Marketing – Agricultural Trade Platform

Team Size	6
Environment	: ASP.Net MVC, C#.Net, Bootstrap, JQuery, CSS, LINQ
Role	: Dot Net Developer
Duration	: Mar-2022 to Des-2023
Client	: Govt. of Andhra Pradesh

Description:

A marketplace connecting farmers, FPOs, and buyers to facilitate online trading of agricultural goods. Maintained RESTful APIs to support real-time listings of **1,000+ agricultural commodities**. Concurrency handling and caching strategies to manage. Blended **SMS and email notifications** transaction flow across buyer and seller interfaces.

Responsibilities

- Implementing functionalities using design pattern-oriented architecture includes service and MVC Architecture.
- Involved in adding new functionalities and enhancements to the application and managing complete release lifecycles.
- Worked on bug fixing and enhancements on change requests.
- Understanding the functionality and implementing the design using ASP.Net MVC, ASP.Net, C# and JavaScript.
- Analyze the defect, understand the requirement and provide the fix within time limit.
- Worked and co-ordinate with Client-side design development Team.
- Developed the client side as well as server-side Validations.
- Involved in developing the front-end UI screens.
- Performed debugging and testing.

Media Relations & AIS Officers Portal

Team Size	10
Environment	: ASP.Net, C#.Net, JQuery, SQL Server, CSS, HTML
Role	: Trainee Software Developer
Duration	: Oct-2021 to Mar-2022

Description

Developed a Media Relations & AIS Officers Management System using ASP.NET, C#, jQuery and SQL Server to centralize press releases, officer directories, and crisis communication — implementing role-based access, audit trails, stored procedures, and a responsive jQuery-driven UI.

Responsibilities

- Design RESTful APIs and Asp.Net controllers for officers, press releases, queries, and reports.
- Implement business logic: approval workflows, publication rules, notification triggers.
- Secure endpoints with role-based authorization (ASP.NET Identity / JWT or Cookie).
- Implement audit logging and exception handling middleware.
- Create and call SQL Server stored procedures for core data operations and reporting.
- Design normalized schema for Officers, Press Releases, Media Queries, Audit Logs, Attachments.
- Write stored procedures for CRUD operations, pagination, and filtered reports.

PERSONAL DETAILS

Name	: Sarvasiddaiah U
DOB	: July 01, 1990
Languages known	: English and Telugu.
Nationality	: Indian
